

Sections 1–2
Problem and
literature

Gap between
access-centric zero
trust and
communication-level
deception; related
work incl. agentic AI.

Section 3
Method

Purposive integrative
review of 66 sources;
per-source coding;
construct
development;
evidence levels.

Sections 4–5
Framework

Threat model,
construct dictionary,
layered decision
model, propositions,
agent-mediated
requests.

Section 6
Illustration

Payment and OT
cases, sector profiles,
60 scenarios, incident
cross-check, Monte
Carlo simulation.

Sections 7–8
Discussion

Findings, feasibility
model, limitations,
and a validation
agenda.

Evidence level: conceptual synthesis (Sections 2–5) and analytical illustration
and simulation (Sections 6–7); empirical validation is future work (Section 7.11).
